

Dear Rising Fourth Graders,

Congratulations on completing **THIRD GRADE**! You have so much to look forward to in **Fourth**. Summer is a wonderful time to have lots of fun, while keeping your skills sharp for next year!

READING: Travel with a great book! Please set aside 20 minutes each day for reading. Please choose one book from the suggested reading list from Mrs. Bryan-Diehl. You should be ready to discuss your understanding of the book upon returning to school in August. In addition, you are expected to complete at least 5 tasks on the **Summer Reading Bingo Board**. Check out our **Fourth Grade** book list for more summer reading suggestions. Happy reading!

WRITING: Summer is a great time to journal. A journal filled with activities, travels, story ideas, events, doodles, fun, and personal thoughts can be a treasured keepsake. Journaling is a terrific way to improve writing skills, develop voice, and practice grammar skills. Journaling is not required, but encouraged.

MATH: Knowing your addition/subtraction and multiplication facts is the most important math skill you will need in 4th grade! Please practice over the summer. Your goal should be to solve all facts within a maximum of 6 seconds each (3 seconds is ideal). If you want to use IXL to stay sharp on your math skills, information on accessing IXL is available on page two of the Math Bingo sheet. Please also complete at least 6 tasks on the **Math Activities Bingo Board**.

On the first day of school, please turn in:

- your completed Summer Reading Bingo Board
- your completed Math Activities Bingo Board

Have a lovely summer! We look forward to a most fabulous fourth grade year with you!

Yours in learning,

Fourth Grade Teachers
